**WHAT'S THE DIFFERENCE BETWEEN 100% AGAVE TEQUILA AND MIXTO TEQUILA?**

**MIXTO TEQUILA** is made by combining a minimum of 51% agave juice with cane sugar dissolved in distilled water, fermenting the mixture using natural yeast then double-distilling it the exact same way they do using 100% agave juice. Mixto tequila is considered a real tequila.. *it's just not 100% Agave Tequila!*

**100% AGAVE TEQUILA** is made by fermenting 100% agave juices (no sugar or water added) using natural yeasts, then double-distilling the fermented juice, which yields a 100% agave tequila.
